## ABOUT ME

---

As a Computer Engineering student, I am passionate about technology and problem-solving. I am looking to learn and grow in a collaborative environment, applying my knowledge while gaining practical experience in the field. I have experience working with data both in web development and in personal projects, performing data cleaning, analysis, and using basic machine learning models.

## EXPERIENCE

---

### Freelance Web Developer

- Developed a full-stack e-commerce platform using React and Node.js.
- Integrated MongoDB to handle application data.
- Implemented features such as order tracking and automated email workflows.

### Projects

- Worked on data projects, including exploratory analysis, data cleaning, and building simple machine learning models.
- Participated in a team-based computer vision project, applying basic image processing techniques.

## EDUCATION

---

### Computer Engineering | UDELAR - Montevideo

- Currently completing the third year.
- Strong foundation in programming, mathematics, and algorithms.
- Knowledge of data structures, abstraction, and efficiency analysis.
- Experience working on technical projects in collaborative environments.

### Jóvenes a Programar | Plan Ceibal - Montevideo

- Training in web development (HTML, CSS, JavaScript, Node.js) and computational thinking.

### Additional Training

- Online training in Python, SQL, and data analysis, along with web technologies (React, Node.js) and Git.
- Experience using Excel for data analysis.
